# Zonation 5 Rules

Objective: Conserve high quality representation across all indicators
**Approach:** Iteratively remove pixels that will do the least harm to the full set of indicators
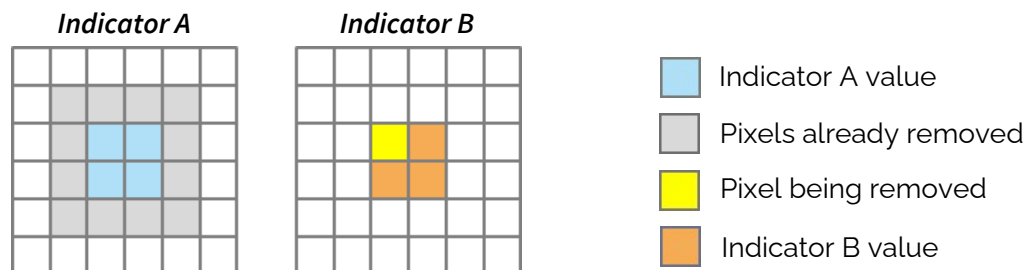

If all else is equal, remove pixels from layers with:

- Lower values

Indicator A

	Pixel being removed
	Higher indicator value
	Lower indicator value

- Larger distributions

Indicator A   *Indicator B*

	Pixel being removed
	Indicator A value
	Indicator B value

- Less loss

Indicator A   *Indicator B*

	Indicator A value
	Pixels already removed
	Pixel being removed
	Indicator B value
